

Saved at St. Winnifred Hospital

(San Francisco Bulletin.)

The physicians in Honolulu could do nothing for U. E. Doherty, Marshall Winters, and he gave them up in despair and came to San Francisco to see if there was any physician here who could cure an extreme case of chronic Bright's disease. He had had two uremic convulsions, was almost bursting with dropsy, and, after fighting the disease for two years, was at the end of the way. The physician he consulted in this city told him that chronic nephritis is now a curable disease, and that he would probably recover. He sent the patient to the St. Winnifred Hospital, put him on the new treatment for chronic Bright's disease, Fenton's renal compound, and proceeded to aid it in every way that the skilled practitioner understands. In four months Winters went back to the islands perfectly well.—San Francisco Bulletin.

We sent for the treatment given the patient referred to in the St. Winnifred Hospital, with such remarkable results and have it in stock for patients here. Chronic Kidney Disease, including Bright's Disease and Diabetes, are now curable.

Do You Own a Steinway, Or Only a Piano?

There are pianos by the hundreds — say five hundred different names —

But there is only one Steinway.

Just as there is only one form of perfection in anything else.

Yet, the word Piano, as applied to the Steinway, is really a misnomer.

The Steinway is a great, harmoniously assembled orchestra — the delicate clearness of the harp, the thousand voices of the violin and the purity of the wind instruments combined in one tone.

There is no limit to its influence and power. If you own a mere Piano, you should get a Steinway. If you have not bought, come and listen to the Steinway.
